

MSVCRT.DLL error prevented installation of Net2Phone in Windows 95

If you received a MSVCRT.DLL error which prevented the installation of Net2Phone in Windows 95, your operating system requires a DLL upgrade provided by Microsoft. Go to the following Microsoft Web site:

<http://www.microsoft.com/downloads>

In the **Search By** area, click **Keywords**

In the **Keywords** box, type **libraries update**.

In the **Operating System** box, click the appropriate operating system (Windows 95), and then click **Find It**.

Click [Windows 95/98/NT 4.0/2000 Microsoft Libraries update](#), and then follow the on-screen directions.

Restart your computer.

Make sure that you have the Installation Cd in your CD drive. Click **Start**, then **Run**. In the **Open** box, type D:\software\N2P\setup.exe and click **OK**. (If your CD-ROM drive uses a different letter, type that letter in place of "D.")

Net2Phone will install and you will no longer receive the error message.
