

March 27, 2013

The hardware design of the 1 Gigabit Fiber Tap families and 10 Gigabit Fiber Tap Families contain no PWB or Radio Frequency (RF) emissions electrical or electronic emitting/susceptible components. Both are based on the same hardware design with population of various totally passive fiber optic splitter components being the determining factor in their difference at final production.

Therefore, U.S. Robotics Corporation hereby contends, based on information provided by our suppliers, our 1 Gigabit Fiber Tap families and 10 Gigabit Fiber Tap families are compliant with the Directives on the restriction of the use of certain hazardous substances in electrical and electronic equipment 2011/65/EU (RoHS 2) and promotes the collection and recycling of such equipment 2012/19/EU, WEEE adopted by the European Union.

Accordingly, it is our intention and decree that we self-certify the 1 Gigabit Fiber Tap families and 10 gigabit Fiber Tap families for compliance with CE requirements of the Restriction of Hazardous Substances Directive 2011/65/EU and the Waste Electrical and Electronic Equipment Directive 2012/19/EU.
